

## Planets and stars

### Write

Our solar system is has eight planets, now imagine that you were given the chance to create your own planet.

1. Write down the name of your planet
2. Who lives in your planet
3. The temperature of your planet
4. How far your is planet from the sun
5. How many moons does your planet have
6. The resources available in your country
7. Draw and colour in your planet

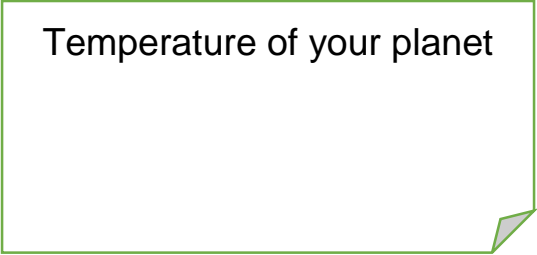

## Design your own planet

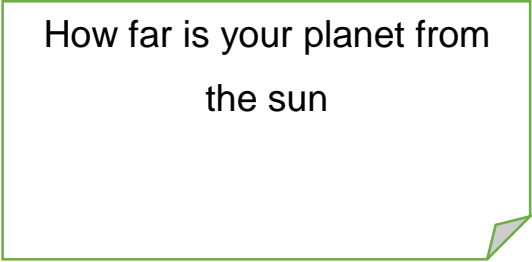

Name of your planet

Who lives in the planet

Temperature of your planet

How far is your planet from the sun

How many moons in your planet

Resources in your country

Draw and colour in your planet.
